

Third Assignment Submission Details:

You need to submit, via the Assignment Submission link on the Assessment page of Blackboard for this unit, a zip file containing the folder for your Visual Studio project. Do not delete any files which Visual Studio has created in your project folder. In the same directory of the Solution file, include the Third Assignment CRA document.

Be sure to rename the CRA document, Name StudentID CRA.docx to be your actual name and student id, for example: Jane Bloggs 8439561 CRA.docx

This zip file is to be named **BMI.zip**

The submission link which is the actual title, has the following image beside it:

Third Assignment

Final Check: After you have zipped your project folder into **BMI.zip** copy the zip file to another location on your computer and then open this zip file and make sure that you can execute your project. This check will ensure that the tutors will be able to run your program, from your zip file.

This all may sound like a “no-brainer” but students have in the past submitted a zip file with some files missing such as the actual source code (the .cs files) and in their place was a shortcut to the real file. So when the tutor tries to run your program, it fails.

It is recommended that you upload your file to Blackboard from a lab at QUT and well before sometime late on the afternoon or night before your registered practical class. Inability to access Blackboard from home is not a sufficient reason for submitting the assignment late.

In accordance with QUT’s policy on Late assignments and extension, if your assignment is not submitted by the due date and you have not been given an extension it will not be marked and will receive 0%.

<http://www.student.qut.edu.au/studying/assessment/late-assignments-and-extensions>

Requests for an extension, see information on “How to apply” in the above link. Do not email me for an extension, I am unable to grant an extension.

Mike Roggenkamp.
